DUCT

“98% 

of airborne particles
measure below 1 micron”
- American Industrial Hygiene Association

“A dirty filter will slow down air flow and make the system work harder to keep you warm or cool – wasting energy and leading to expensive repairs and/or early system failure.” -Energy StaR 

“1/8th of an inch of dirt and dust build up on the blower wheel can reduce airflow by up to 30%”
-Texas A&M Study

“A buildup of .042 (1/20) inches of dirt on the heating or cooling coil can result in a decrease in efficiency of 21%”
-Environmental Protection Agency

Your heating and cooling system moves 1.4 million cubic feet of air per day containing visible and invisible contaminants

“5 Microns

and below pass through our lungs”

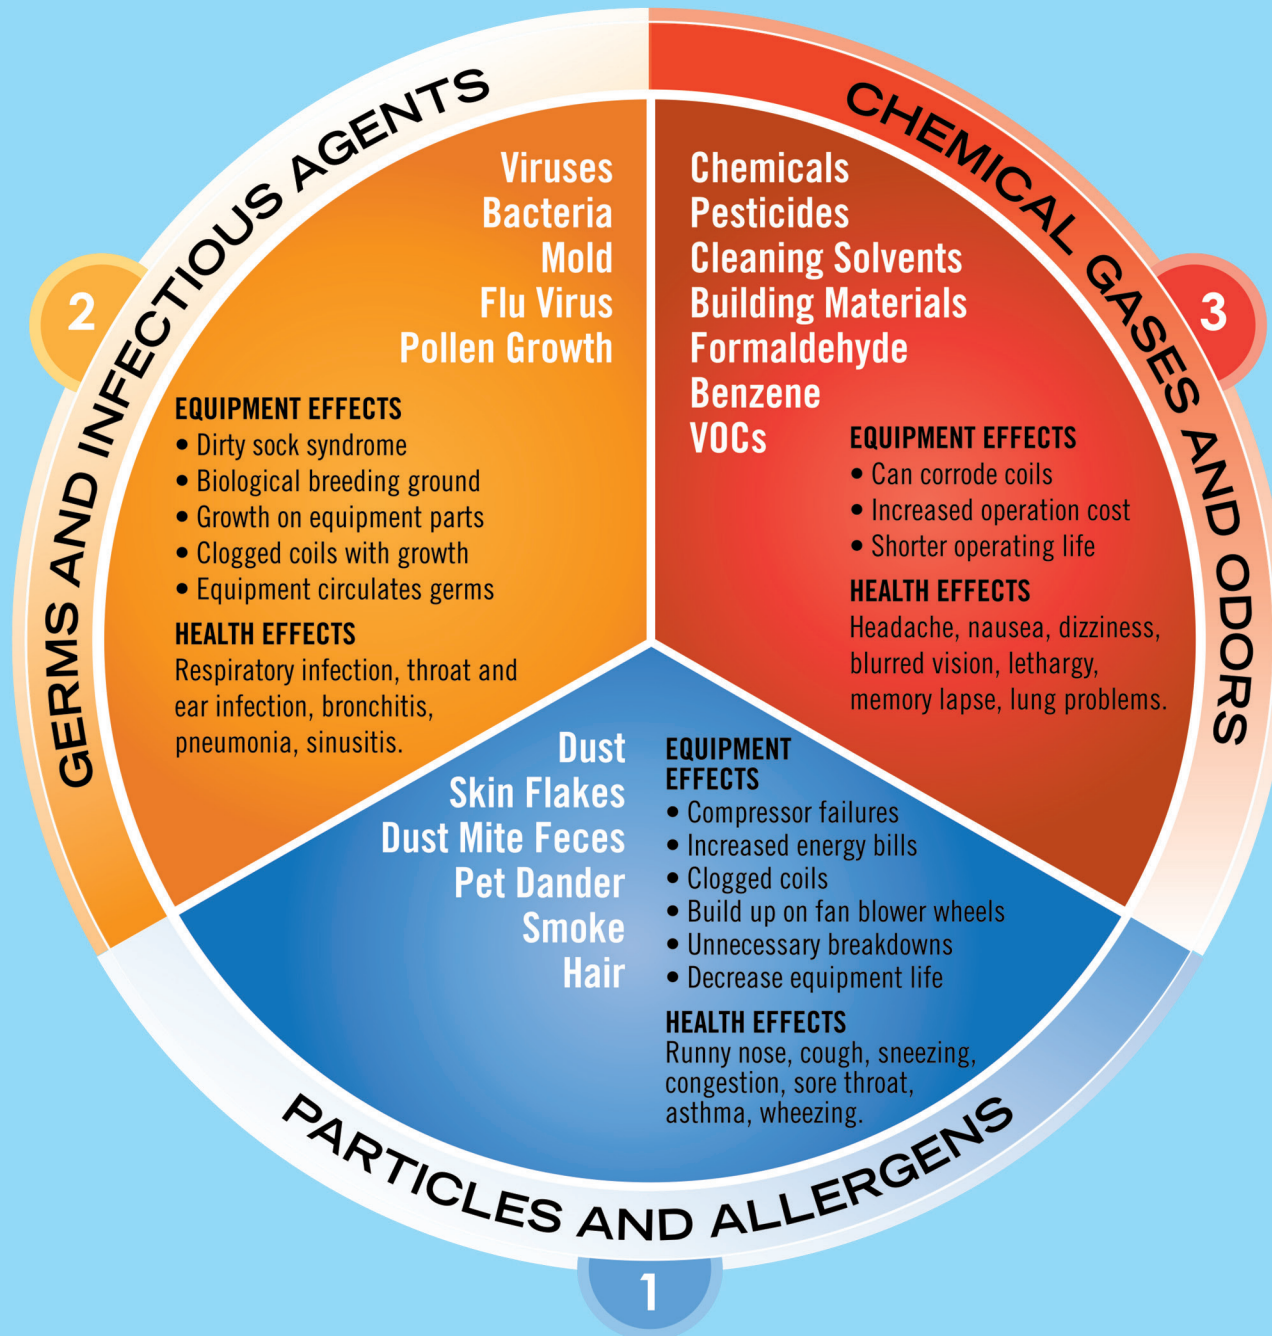

- American Lung Association

Indoor Air Contaminants

You learned about particle contaminants....
What about

2 GERMS & **3** GASES

All the benefits of the Electronic Air Cleaner

- Excellent whole-house particle, germ and gas control
- Protects your equipment and prevents paying too much in utility bills
- Fewer cold and flu episodes
- Collects 97% of particles from 200 to .3 microns
- Disinfects your air 24 hours a day naturally without chemicals
- Asthma and allergy relief

- ✓ Polarized-Media Air Cleaner
- ✓ UVC Gemicidal Unit

Standard Low-Output UVC lamps can only kill germs on surfaces inside your HVAC system, while High-Output UVC lamps can kill on these surfaces as well as sterilize airborne viruses, bacteria and germs as they pass by the lamp, rendering them harmless and incapable of reproducing.

High-Output UVC lamps are 3.3 times more powerful than standard lamps and will disinfect your air 24 hours a day naturally, without adding chemicals or sprays into your environment.
